GREENS
TECHNOLOGIES

Course syllabus

Artificial Intelligence

Learn AI with Python, machine learning, deep learning and TensorFlow. Build neural networks, work on real-time projects and prepare for certification with classes in English and Tamil.

125+ hrs
Hands-on training

2
Live projects

English & Tamil
Classes available

Greens Technology, Coimbatore, Tamil Nadu | Syllabus version: October 2026

Course content

From neural network basics to working AI models.

The course starts with Python and machine learning fundamentals, then builds up to deep learning, computer vision, sequence models and chatbots. Anyone can join, whatever your prior knowledge.

Tools you will work with

Python · TensorFlow · Keras · TFLearn · TensorBoard · CNN · RNN · LSTM · IBM Watson

Foundation	**Deep Learning and Neural Networks**	Supervised and unsupervised learning, classification, regression, clustering, and the statistics behind them, including hypothesis testing and probability distributions. No prerequisites · Python
Core	**Multi-layer Neural Networks**	Multi-layer perceptrons, activation functions (ReLU, softmax, sigmoid), forward and back propagation, overfitting, regularization and hyperparameters. Perceptron · Back propagation
Libraries	**TensorFlow, Keras and TFLearn**	Design, build and train models with TensorFlow, compose them with the Keras and TFLearn APIs, and monitor training with TensorBoard. TensorFlow · Keras
Vision	**Convolutional Neural Networks**	CNN architecture, pooling layers, feature maps, transfer learning and fine-tuning, applied to image recognition and image processing. CNN · Image recognition
Sequences	**Recurrent Neural Networks**	RNN cells, LSTM, back propagation through time and time-series prediction, plus GPUs in deep learning and autoencoders. RNN / LSTM · Time series
Applications	**NLP and Chatbots**	Natural language processing, speech recognition and video analytics, and building chatbots with IBM Watson and sequence-to-sequence models. NLP · Chatbots

Live projects

Build AI you can show in interviews.

Every learner works on real-time case studies and hands-on projects before the course ends.

AI-based chatbot Build a chatbot using IBM Watson	NLP
E-commerce recommender Recommend the right products to customers using TensorFlow	Recommender
Image recognition Create a deep learning model that identifies the right object for a user's image search	Vision

How you can learn

Online, classroom at our Coimbatore centre, one-to-one and corporate training, with weekend batches.

Want batch timings and fees?

Call or message us. An advisor will share the latest batches, free demo class dates and fees, and help you pick the right path.
