Greens Technology, Coimbatore, Tamil Nadu | Syllabus version: October 2026

Learning path

Start with the foundation. Then choose your role.

Everyone begins with Cloud Practitioner. After that, pick one Associate track based on the work you want to do: Solutions Architect to design systems, CloudOps Engineer to run and monitor systems, or Developer to build applications. Foundational plus one Associate track is 40+ hrs and 2 projects.

Services you will work with

IAM · VPC · EC2 · S3 · RDS · DynamoDB · Route 53 · CloudWatch · Lambda

Track details

Duration, prerequisites, projects and curriculum.

Step 1 · Foundational

Cloud Practitioner

CLF-C02
Foundational
10 hrs

Duration
10 hrs Instructor-led sessions plus a guided lab. Start here before any Associate track.

Prerequisites
None. Freshers and non-technical learners are welcome.

Project
Guided project: set up an AWS account safely, create IAM users with MFA, host a static website on S3 and set a cost budget.

Curriculum modules

01 **Cloud concepts**
Benefits of the AWS Cloud, cloud economics, the Well-Architected pillars, Regions, Availability Zones and edge locations.

02 **Security and compliance**
Shared responsibility model, IAM users, roles and policies, MFA, encryption basics and compliance resources.

03 **Core AWS services**
Compute (EC2, Lambda, containers), storage (S3, EBS, EFS), databases (RDS, DynamoDB) and networking (VPC, Route 53, CloudFront).

04 **Billing, pricing and support**
On-Demand, Reserved and Spot pricing, Savings Plans, Cost Explorer, Budgets and AWS Support plans.

05 **Exam readiness**
Practice questions, a full mock exam and exam-day guidance.

Step 2 · Associate · Architect

Solutions Architect

SAA-C03
Associate
30+ hrs

Duration
30+ hrs Foundational + this track = 40+ hrs.

Prerequisites
Cloud Practitioner or equivalent AWS basics, plus basic networking and operating-system knowledge.

Project
Capstone project: design and deploy a highly available three-tier web application with a load balancer, Auto Scaling and a Multi-AZ database.

Curriculum modules

01 Design secure architectures
Advanced IAM, KMS, VPC security groups and network ACLs, data protection and multi-account governance with AWS Organizations.

02 Design resilient architectures
Multi-AZ and multi-Region designs, Elastic Load Balancing, Auto Scaling, decoupling with SQS and SNS, backup and disaster-recovery strategies.

03 Design high-performing architectures
Choosing compute, storage and database services, caching with ElastiCache and CloudFront, VPC design and connectivity.

04 Design cost-optimized architectures
Storage tiers and lifecycle rules, right-sizing, purchase options and cost-monitoring tools.

05 Project and exam readiness
Capstone build, scenario-based practice questions and mock exams.

Step 2 · Associate · Operations

CloudOps Engineer

SOA-C03
Associate
30+ hrs

Duration
30+ hrs
Foundational + this track = 40+ hrs.
Formerly SysOps Administrator.

Prerequisites
Cloud Practitioner or equivalent AWS basics, plus Linux administration, scripting and networking basics.

Project
Capstone project: build monitoring, alerting and automated remediation for a running workload using CloudWatch, Systems Manager and CloudFormation.

Curriculum modules

01 Monitoring, logging and remediation
CloudWatch metrics, alarms and logs, EventBridge, CloudTrail, AWS Config and performance tuning.

02 Reliability and business continuity
Auto Scaling, load balancing, AWS Backup, multi-AZ and multi-Region recovery.

03 Deployment, provisioning and automation
Infrastructure as code with CloudFormation, Systems Manager, AMIs and an introduction to containers on AWS.

04 Security and compliance
IAM, KMS, Secrets Manager, Config rules and multi-account controls.

05 Networking and content delivery
VPC design, Route 53, CloudFront, VPN and Direct Connect, plus connectivity troubleshooting.

06 Project and exam readiness
Capstone build and mock exams.

Step 2 · Associate · Developer

Developer

DVA-C02
Associate
30+ hrs

Duration
30+ hrs Foundational + this track = 40+ hrs. AWS is replacing DVA-C02 with DVA-C03 from late 2026; ask us which version your batch prepares for.

Prerequisites
Cloud Practitioner or equivalent AWS basics, plus working knowledge of at least one programming language such as Python, Java or Node.js.

Project
Capstone project: build and deploy a serverless REST API with API Gateway, Lambda and DynamoDB, released through an automated pipeline.

Curriculum modules

01 Development with AWS services
Lambda, API Gateway, DynamoDB, S3, SQS, SNS, Step Functions, and using the AWS SDK and CLI.

02 Security
IAM roles for applications, Amazon Cognito, KMS, Secrets Manager, Parameter Store and encryption.

03 Deployment
CI/CD with CodeBuild, CodeDeploy and CodePipeline, CloudFormation and SAM, Elastic Beanstalk and container images.

04 Troubleshooting and optimization
CloudWatch, X-Ray tracing, caching, and tuning application performance and cost.

05 Project and exam readiness
Capstone build and mock exams.

How you can learn

Online, classroom at our Coimbatore centre, one-to-one and corporate training, with weekend batches.

Want batch timings and fees?

Call or message us. An advisor will share the latest batches, free demo class dates and fees, and help you pick the right path.
