Greens Technology, Coimbatore, Tamil Nadu | Syllabus version: October 2026

Learning path

Build the skills needed for a modern analytics role.

Progress from business analytics and SQL fundamentals to Python, visualization, machine learning and real-world capstone projects.

Tools and technologies you will work with

Excel · SQL · Python · R · Tableau · Power BI · SAS · Talend · Machine Learning · AWS/Azure · Spark

Business Analytics	**Business Analytics with Excel**	Strengthen advanced Excel, modelling and analytics skills, including Power BI-oriented business reporting. Excel · Power BI
Visualization	**Tableau Training**	Learn Tableau for data visualization, reporting and business intelligence use cases. Tableau · BI
Dashboards	**Power BI**	Work with Power BI Desktop layouts, reports, dashboards, DAX commands and functions. Power BI · DAX
Programming	**Data Analytics with Python**	Analyse data with Python using NumPy and pandas, then build practical analytics workflows. Python · pandas
Data	**SQL & Data Preparation**	Build practical skills in SQL, querying, reporting and preparing data for analytics. SQL · Reporting
Statistics	**Probability & Statistics**	Develop the statistical foundation required to understand, interpret and communicate analytical results. Probability · Statistics
Advanced	**Machine Learning**	Extend analytics skills into predictive modelling and machine learning techniques for business problems. ML · Predictive
Engineering	**Data Engineering & ETL**	Explore data engineering and analytics workflows with ETL, Talend, SQL and modern data platforms. ETL · Talend
Project	**Capstone Project**	Apply the learning to real-time case studies and projects to gain practical Data Analytics exposure. Case studies · Projects

Course curriculum

Follow a structured Data Analytics curriculum.

The published curriculum covers probability and statistics, SQL, R, Python, Excel, Tableau, Power BI, placement preparation and a capstone project.

01	**Probability and Statistics** Statistical foundations for analytics	Core
02	**SQL** Querying, preparation and reporting	Core
03	**Data Analytics with R** R-based analytics and data manipulation	R
04	**Data Analytics with Python** Python, NumPy and pandas	Python
05	**Business Analysis with Excel** Advanced Excel analytics and modelling	Excel
06	**Data Visualization with Tableau** Visualization, reporting and BI	Tableau
07	**Data Visualization with Power BI** Dashboards, DAX and business reporting	Power BI
08	**Placement Preparation** Career and interview preparation	Career
09	**Capstone Project** Integrated practical project experience	Project

How you can learn

Online, classroom at our Coimbatore centre, one-to-one and corporate training, with weekend batches.

Want batch timings and fees?

Call or message us. An advisor will share the latest batches, free demo class dates and fees, and help you pick the right path.
